- Confirmed Placement in EUROPE in above countries after internship.

## About the University

In 1950, Riga Medical Institute was established on the basis of the Faculty of Medicine of the State University of Latvia. Initially the institute included the faculties of medicine, dentistry and pharmacy, as well as 45 departments.

Rīga Stradiņš University is a state-funded university which offers various study programmes and ensures the realisation of scientific projects, providing training of experts in health care and social sciences who work in Latvia and across the world. It is the only university in Latvia which has traditionally been integrated into the healthcare system of the country, and therefore ensures a successful run of the university, which is a precondition for an effective existence of the health care system in Latvia.

RSU is autonomous and academically free to pursue its goals and tasks, working for the benefit of the state and society, and offering a wide array of academic and professional education and research opportunities in the fields of health care, social care, social sciences and natural sciences.

Riga Stradiņš University is ranked in the top 801-1000 universities in the world as of 2021.

## About the University

The departments of the Faculty of Medicine coordinate the training of students in all clinical and theoretical medical disciplines. In cooperation with universities and scientific institutes of other countries, the departments of the faculty have become scientific schools and research centers that ensure the professional quality of RSU teaching staff.

Starting from the second year of studies, students of the Faculty of Medicine have the opportunity to acquire in-depth knowledge in pediatrics. The learning process also includes practices in clinical care of patients, oral diseases, surgery, obstetrics and gynecology, supplementing theoretical knowledge with practical skills.

RSU Medical Faculty graduates and lecturers successfully work in Latvian and foreign clinics, research institutes and international health care organizations.

# Hospitals of RIGA STRADIN UNIVERSITY

Unlike medical studies at most European institutions of higher education, studies at Rīga Stradiņš University (RSU) Faculty of Medicine are more integrated with clinical practice. Students learn the basics of the profession at RSU clinical hospitals and the main medical treatment and scientific institutions in Latvia:

- 1) P. Stradiņš Clinical University Hospital,
- 2) Children's Clinical University Hospital,
- 3) Riga East University Hospital,
- 4) Hospital of Traumatology and Orthopaedics.
